

This leaflet provides important information about using REJURAN<sup>®</sup>. You should also speak to your health practitioner if you would like further information, or if you have any concerns or questions about having a REJURAN<sup>®</sup> treatment.

**REJURAN<sup>®</sup> DOT<sup>™</sup> the New Paradigm Shift for Skin Quality.**

**1. What is REJURAN<sup>®</sup>?**

REJURAN<sup>®</sup> is an innovative Bio-Regenerator injectable. It is a gel formation of polynucleotides, made of wild salmon DNA fragments extracted using PharmaResearch's proprietary DOT<sup>™</sup> technology (DNA Optimising Technology). Unlike hyaluronic acid skin boosters, REJURAN<sup>®</sup> consists of bio-active DNA molecules that stimulate tissue regeneration and repair damaged skin while reducing unwanted inflammation. REJURAN<sup>®</sup> is a TGA, CE-approved medical injectable.

**2. What is the Active ingredient: polynucleotide?**

- DNA fragments are extracted from wild salmon using PharmaResearch's proprietary DNA Optimising Technology (DOT<sup>™</sup>)
- REJURAN<sup>®</sup> PN is proven to be the most compatible to human skin without causing any adverse effects.
- Clear, colourless, and viscous solution
- Stimulates the skin's own reparative and restorative capabilities upon injection.
- REJURAN<sup>®</sup> PN are long DNA chains that maintain a long-lasting and slow-degrading structure when injected, which helps to rejuvenate and heal the skin. REJURAN<sup>®</sup> PN injections increase skin elasticity and rejuvenation by stimulating collagen production from fibroblast cells in the skin's dermis and epidermis layers.

**3. What are the benefits of REJURAN<sup>®</sup> polynucleotide?**

- Protective layer of the skin by increasing thickness and density of inner skin
- Promotes collagen synthesis in the skin.
- Reduces fine lines & wrinkles.
- Reduces Pigmentation
- Reduces Sagging Skin
- Improves skin elasticity.
- Improves Hydration
- Improves acne-scarred tissues.
- Reduces enlarged pores.

**4. Who is suitable for REJURAN<sup>®</sup> polynucleotide?**

- Those who desire a natural and healthy skin.
- Those who desire to freshen and tighten facial skin.
- Those who have dark eye circles and dull skin.
- Those who have fine wrinkles on their face.
- Those who have sensitive and thin skin.
- Those who do not want Fillers or Toxins anymore.
- Those who have skin sagging and acne scars, stretch marks.
- Those who experience side effects caused by

**5. What should I know before REJURAN<sup>®</sup> treatment?**

An initial cycle of three or more REJURAN<sup>®</sup> treatment sessions two to three weeks apart is recommended. This will be confirmed by your health practitioner.

Please tell your health practitioner what skincare topical treatments and non-surgical cosmetic treatments you have had.

**Check with your health practitioner if you:**

- suffer from bleeding disorders.
- received dermal filler (Cross-linked HA) injections, there can be occurrences of granuloma and hypersensitivity.
- have any other medical conditions.
- take any medicines for any other condition.
- are pregnant or intend to become pregnant.
- are breastfeeding or intend to breastfeed.

## 6. What should I do after REJURAN® treatment?

### polynucleotide?

After the procedure, you should carefully apply sunscreen with a high SPF index to prevent pigmentation. REJURAN® can be shortened due to sun exposure (UV rays).

### Things you should avoid:

- Refrain from high-temperature entrances such as saunas. Excessive massage, such as scleroderma, and UV radiation should be avoided for two weeks after the procedure.
- Physical strain, headfirst movements and sports the day of and the day after treatment.
- Avoid chemical peel after the treatment for two weeks.

- **What are the side effects?**  
If there's anything you're unsure about,

### polynucleotide?

All medical products can have side effects. If you do experience any side effects, most of them would be expected to be minor and temporary. However, some side effects may need medical attention.

### ADVERSE REACTIONS AND POSSIBLE COMPLICATIONS

- The procedure may result in minor redness, swelling, skin sensitivity, injection marks, small visible bumps, etc., this will subside within 1~3 days.
- Minor flaking, dryness and peeling which may last several days.
- Scabs may form but will fall off within a few days.

### What to do

Tell your health practitioner if you notice anything else that may be making you feel unwell. Other side effects not listed here may occur in some people.

Always make sure you speak to your doctor or pharmacist before you decide to stop taking any of your medicines.

## 8. Product details

### polynucleotide?

REJURAN®. is an innovative injectable product for dermal rejuvenation. It is a gel formation of polynucleotides, made of wild salmon DNA fragments extracted using PharmaResearch's proprietary DOT™ technology (DNA Optimising Technology). It comes in a sealed box.

### Packaging included:

#### REJURAN® Classic

- Packing Unit: 2ml x 2 Syringes in 1box
- Needle Size: JBP nano-needle 33G, 4mm
- Intended Purpose: Face (all areas, perioral area), neck, Décolleté, hands etc.
- Administration: Intra-dermal injection
- Storage: Room temperature(1~30°C)

#### REJURAN® i (eye)

- Packing Unit: 1ml x 1 Syringe in 1box
- Needle Size: JBP nano-needle 34G, 4mm
- Intended Purpose: Face, especially eye, perioral area.

- Administration: Intra-dermal injection
- Storage: Room temperature(1~30°C)

#### REJURAN® s (scar)

- Packing Unit: 1ml x 1 Syringe in 1box
- Needle Size: JBP nano-needle 30G, 8mm
- Intended Purpose: Face, especially eye, perioral area.
